

CSD System Notification

	NUMBER 16-13
TO All Program Managers, Executive Directors, CORE Users, CSD Technology Steering Committee	DATE ISSUED: 6/24/16
SUBJECT Solar Water Heater – LIWP Calculator	EXPIRES Until Superseded
REFERENCES N/A	SUPERSEDES N/A
INQUIRIES SHOULD BE DIRECTED TO: Energy Help Desk Energy.HelpDesk@csd.ca.gov	

Purpose of Communication

CSD has been made aware of an issue concerning the Weatherization Database rejecting records due to a discrepancy between the LIWP calculator and the LIWP solar water heater measure. Currently, there is no line measure on the LIWP calculator for solar water heaters, therefore there is no carbon offset (CO) reduction calculated. LIWP files with a zero CO reduction are rejected. This rejection is causing Expenditure Reports to not reconcile.

Impact

This issue applies to any agency submitting jobs that contain only a solar water heater billed to LIWP.

Resolution

A code fix is scheduled for deployment on July 9th.

Timeline

The code fix was completed last week. It is currently being tested and is scheduled for release in July.

Method for Resolution

CSD will temporarily suspend reconciling reporting LIWP solar water heater project costs until the fix is deployed.

Root Cause

There is an error in the LIWP calculator code that causes a validation failure for jobs that contain only solar water heaters.
